

Electronic Health Record

Focused Technology for Specialty Care

digiChart ADVANTAGE

digiChart was built for OB/GYNs - by OB/GYNs. We understand the unique demands of the OB/GYN practice and developed a solution to work the way you work.

- ✓ Cloud-based anytime-anywhere access
- ✓ Preloaded OB/GYN clinical treatment plans
- ✓ Immediate electronic access to the Antepartum Record
- ✓ Automatic upgrades and updates to CPT and ICD-9
- ✓ OB/GYN-specific patient portal

“The ability to access patient charts from anywhere improves my ability to handle patients, particularly high-risk patients. We have been able to attract new patients to our practice by using cutting-edge technology.”

*Jennifer Risinger, MD, FACOG
Women Physicians Associates
Columbia, S.C.*

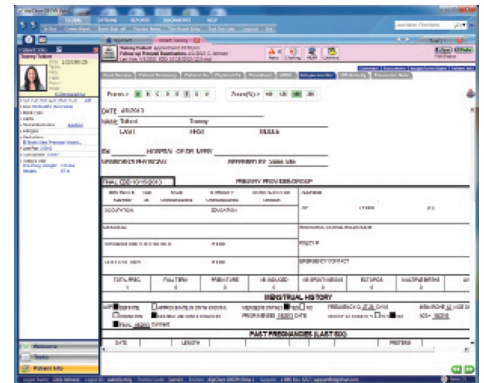

digiChart is the only EHR that mimics the workflow in the OB/GYN practice, improves clinical decision-making and gives all providers the same level of documentation capabilities, rules, alerts and reminders to enhance patient care.

ACCESS DATA ANYTIME, ANYWHERE

Your EHR should be accessible whenever and wherever you need it. digiChart uses the latest cloud-computing technology so that critical patient data is available in your office, in the hospital Labor and Delivery department, or on the road. All you need is an internet connection to review patient information.

ELECTRONIC ACCESS TO ANTEPARTUM RECORD

digiChart incorporates the complete Antepartum record (forms A through U) and the progress note in the EHR – meaning that data is entered once. No manual transcription needed.

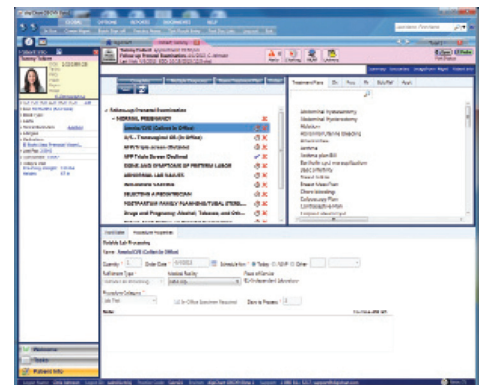

MORE TIME WITH YOUR PATIENTS

With our integrated portal, patients communicate their medical history prior to office visits, leaving you more time to spend on exams, treatment plans and counseling. In fact, 35% of patients are using the portal within the first week and 85% within the first six months.

NO MORE TEMPLATES TO BUILD

With medical decision-making and e-prescribing you can quickly select diagnoses, procedures, medications and education materials for each type of encounter. Easily order and e-prescribe your own set of frequently used medications. This cloud-based system comes preloaded with dozens of easy-to-edit clinical treatment plans covering most women’s health issues.

See how an OB/GYN-specific solution will help your practice.
